12th June 2017

Dear Parent/Guardian,

Year 6 Health and Wellbeing Survey

We are writing to inform you that Year 6 children will be taking part in a health and wellbeing survey. We are one of 20 schools across West Sussex where the survey is taking place.

Children will be completing a questionnaire at school on Monday, 26th June, 2017.

The survey is being conducted by West Sussex County Council’s Public Health and Social Research Unit.

The survey aims to examine various aspects of children’s lives such as their health, happiness, strengths and emotional wellbeing. Alongside this, it also asks questions about children’s diets, exercise, and leisure time.

The results of the survey will provide vital information about children across the county. This will be used to develop policies and improve services and information for parents and children. It will also provide schools with information about the health and wellbeing of their children.

All information collected will be treated in the strictest confidence and it will not be possible for the research team to identify the responses given by individual children.

We would very much value the participation of your child. However, if you **do not** wish your child to take part in the survey please fill in the form below and return it to their class teacher before the date above.

Please note that if you are happy for your child to participate in the survey, you do not need to return the form below.

If you have any questions regarding this please contact Robert Whitehead, Research Officer, on 033022 25371 or email: robert.whitehead@westsussex.gov.uk

Yours sincerely,

Helen Williamson
